

FORM 41: RETIREMENT PLAN FEES FOR 2019

The FCMM Retirement Plan enables ministry staff to develop a successful retirement life plan with a reliable source of retirement savings and income from money deposited by employing ministry organizations. FCMM is incorporated as the church benefits board of the Evangelical Free Church of America (EFCA) and administers the Retirement Plan in accord with the tenets and polity of the EFCA, which shape investment and operational policies.

Fees and allocation of costs pay for administration, investment trading, web-based access, investment advisers, and financial management that are incurred in operating the Retirement Plan.

There are three types of investment Options: mutual funds, an adjustable rate investment (CIF), and FCMM-managed funds. Participants invest in mutual funds through FCMM's partnership with the Alerus, providing access to American Funds (Option F), Vanguard Funds (Option G), and Timothy Plan Funds and GuideStone Funds (Option J: Biblically Responsible). Costs and fees for each fund family are applied as described below. No fees are charged to participating employers.

● MUTUAL FUNDS

Mutual Funds: American Funds (Option F)

Alerus provides access to over 25 of the R6 class of American Funds in Option F. There are no load fees for transactions. These funds are free of embedded revenue-sharing fees, such as 12b-1, subTA, or SSA fees. Participants investing in American Funds have access to advice on selecting mutual funds and/or FCMM-managed collective funds for their financial situation. FCMM assesses a Retirement Plan management fee of 74 basis points (.74 %) per year after reported mutual fund returns: The fee is deducted quarterly (18.5 basis points, or .185%), calculated on market value at the end of the quarter.

Mutual Funds: Biblically Responsible Funds (Option J)

Alerus provides access to the institutional class of 10 Timothy Plan Funds and more than 20 GuideStone Funds in Option J. There are no load fees for transactions. These funds are free of embedded revenue-sharing fees, such as 12b-1, subTA, or SSA fees. Participants investing in Timothy Plan or GuideStone Funds have access to advice on selecting mutual funds and/or FCMM-managed collective funds for their financial situation. FCMM assesses a Retirement Plan management fee of 74 basis points (.74 %) per year after reported mutual fund returns: The fee is deducted quarterly (18.5 basis points, or .185%), calculated on market value at the end of the quarter.

Mutual Funds: Vanguard Funds (Option G)

Alerus provides access to almost 80 Vanguard funds. There are no load fees for transactions. These funds are free of embedded revenue-sharing fees, such as 12b-1, subTA, or SSA fees. Vanguard funds operate with low internal cost and are designed for the experienced investor. Investment advice is not normally offered for funds of this Option. FCMM assesses a Retirement Plan management fee of 54 basis points (.54 %) per year after reported mutual fund returns: The fee is deducted quarterly (13.5 basis points, or .135%), calculated on market value at the end of the quarter.

● ADJUSTABLE RATE INVESTMENT (Option H)

Christian Investors Financial (CIF) pays an administrative fee 50 basis points (0.5%) to FCMM on the adjustable rate Investment Certificate. Participants in this option pay no fees and receive the published "403(b)(9) certificate" rate. Prospective investors should refer to CIF's current Offering Circular for risk factors and other information for investment decisions. Current rate information is available at www.christianinvestors.org.

● FCMM-MANAGED FUNDS (Options C, D, E)

The FCMM-managed fund Options are invested in managed collective fund portfolios. These Options incur transaction and investment management costs charged by the investment advisor and managers. Such fees are deducted before reported performance returns. [See Form 40 Performance Report.]

Operating costs (i.e. administration, legal, compliance, customer service) for the Retirement Plan are charged to each Option (C, D, E) based on market value and allocation criteria. When calculated as percentage of managed assets, the operating costs are estimated to be 74 basis points (0.74%) in 2019. The percentage may vary due to market value and expense allocation changes. Participant earnings and account values are reported net of ("after") both investment costs and these operating costs.

There are no other sales commissions, charges, loads, or 12b-1 fees applicable to the FCMM-managed funds.
